## TECHNICAL SKILLS

---

**Front End** | React,Dart,Flutter Javascript, TypeScript, NodeJS, CSS, styled-components,Tailwind CSS,Angular,web3.js

**Back End** | Java, SpringBoot,NodeJS,Symfony, MongoDB, MySQL,Redis,Solidity,hardHat

**Testing/Deployment** | JUnit,Selenium

**Developer Tools** | Git, npm, Agile Methodology, TDD,Maven

## EXPERIENCE & PROJECTS

---

### Full stack Mobile Developer | Sport Up

Mars 2023 - Present

*Built a full social media app with flutter and nodejs ,*

Javascript | Node.js | Express | Flutter | Socket IO| MongoDB

- Developed a full-fledged social media app using Flutter and Node.js.
- Designed and implemented user authentication, registration, and profile management features.
- Implemented CRUD operations for posts, comments, and user connections Integrated real-time messaging functionality using Socket.IO for instant communication.
- Utilized Google Maps API to provide interactive maps and location-based services.
- Created a responsive and intuitive user interface for seamless user experience.
- Handled image and file uploads for user profiles and post media.
- Ensured data integrity and security through error handling and validation.

### Backend Developer | NeoCortex

feb 2023 -Present

*Built a full backend for dashboarding platforme with spring Boot*

Java| SpringBoot | Rest API| MySQL

- Developed a scalable and robust backend for a dashboarding platform using Spring Boot.
- Implemented RESTful APIs for data retrieval, processing, and management. D- esigned and developed database schemas and integrated them using Spring Data JPA.
- Implemented user authentication and authorization using Spring Security.
- Integrated third-party APIs for data integration and external service communication.
- Utilized caching mechanisms (Hazelcast) to improve system performance.
- Implemented scheduled tasks and background processing using Spring's scheduling capabilities.
- Designed and implemented data models and performed database migrations.
- Ensured code quality and maintainability through unit testing and code reviews.

### Full stack Web Developer | Personal Project

Jan 2022 - Mars 2022

\*A complete web platform (KIDY) built to reduce the distance between children and their partner \*

JavaScript | ReactJS | Tailwind | Node.js | Express | MySQL

- Designed and implemented user-friendly and responsive user interfaces using ReactJS and Tailwind CSS.
- Implemented backend functionality using Node.js and Express, handling routing, request handling, and data processing.
- Utilized MySQL as the database management system for storing and retrieving data.
- Designed and implemented user authentication and authorization features for secure access to the platform.
- Integrated third-party APIs and services to enhance platform functionality and user experience.

## EDUCATION

---

Higher Institute of Technological Studies of Rades - Bachelors of information technology

2023
